Finite-size scaling of [Observable]
Project summary - placeholder document

This file is a placeholder that demonstrates the inline PDF viewer on the project page. The real one-page summary is not published here while the work is with the research group.

The summary, when released, will cover: the research question, the system-size series, the fitting procedure, and the uncertainty estimate. Its content corresponds to what is already described in text on the project page.

To request the summary, please email [email@example.com].
